

Almond Farmer Testimonials for Soil Treatment and Calcium Amendments...

“I was introduced to Ultra Gro’s 6-0-0-8 Calcium Soil Treatment at 1 gallon per acre and 2 gallons of the 8-0-0-11 Calcium Complex. We have found that it has helped our water penetration in the soil extremely. We have tried other products but have not had the success that we have had with Ultra Gro. We had to use twice as much material with less efficiency than the once every 6 month application of Ultra Gro. Ultra Gro is the only product that we have used that has worked consistently. We are going to use Ultra Gro on all of our orchards.”

Ken Aldrin, Montpelier Orchard Management, Denair, CA - February 5, 1996*

“We have been using the Ultra Gro Soil Treatment and Thioplex combination for the last few years in both a Post-Harvest application and a Spring application. We use 1 gallon of Soil Treatment and 14 gallons of Thioplex for each application. We have seen a lot of positive results using these products. Yield increases, better water penetration/management and overall better orchard health. We think it’s helping a lot with nut quality, sizing and turnouts. We are using it on more and more acres every year.”

Danny Paiva, Paiva Farms, Chico, CA – September 9, 2008

“I have been a user of the Ultra Gro products since 1989. We have had great success at several different locations using the Ultra Gro Soil Treatment in combination with both the Thioplex and the Calcium Complex. It works well for us in almonds, pistachios and grapes. It has been a strong part of our development program on first year orchards and vines, as well as established orchards and vines. We use it to flush the root zone and create better water/nutrient uptake through the root system; as a result, we have seen increased yields, more consistent fruit quality and a stronger plant.”

Herb Kaler, RAM Management, Madera, CA – September 10, 2008
