

Mettler area pepper grower

Grower used his normal fertilizer program and split an 80 acre block allowing us to add 1 gallon of Ultra Gro Soil Treatment blended with 5 gallons of Thio Plex and two different applications of 5 gallons each 2-17-17 to 40 of the acres. The additional cost of the Ultra Gro was \$105 per acre. There was a 33 box per acre increase on the Ultra Gro acres. At the time, peppers were worth \$8.50 per box. The gross increase per acre was \$280.50, minus our cost of \$105.00 netted the grower \$175.50 per acre.
