

#### **Mettler area lettuce grower**

Grower bedded up 160 acres with 35 gallons to the acre of 10-34-0 and used his normal Nitrogen program. We sprinkled up 30 acre strips through the 160 acres with 1 gallon of Ultra Gro Soil Treatment. The untreated average was 752 boxes per acre. The strips sprinkled up with the Ultra Gro Soil Treatment averaged 906 boxes per acre, yielding a 154 box per acre increase. The cost of the Ultra Gro Soil Treatment was \$25.00. At the time, lettuce was \$5.50 per box. The gross revenue increase per acre was \$847, minus our cost of the soil treatment netted the grower \$822 per acre.
