## RECOMMENDATIONS

ULTRA GRO GAME-CHANGER is designed to be applied as a foliar application. This product should be applied when temperatures are expected to be above 95°F for 5 consecutive days of application and repeated every 15 to 30 days depending on rate. Best results will be obtained when application is concentrated on the leaf surface.

Can be applied in combination with compatible plant growth regulators, pesticides, or other liquid fertilizers. If compatibility is in questions, jar test a small quantity. Apply foliar sprays with sufficient water to ensure uniform coverage without running off leaf surfaces.

For maximum results, apply in the early morning or in the evening when air temperatures are optimum for foliar application.

**FOLIAR APPLICATION** - Ultra Gro GAME-CHANGER is a concentrated solution and should be diluted with enough water before use to ensure uniform coverage.

**Ground Applications:** Apply Ultra Gro GAME-CHANGER solution with a minimum 20 gallons of water per acre..

**Aerial Applications:** Use a minimum of 10 gal. of water per acre. Maximum concentration of 2 gals. Per 10 gal. of spray may be used. The use of more water has shown to give better results/

### SUGGESTED APPLICATION RATES:

Vegetable/Field crops including: Beans, peas, potatoes, corn, cotton tomatoes, melons, etc.

Tree and Vines Crops including: Almond, apple apricot, avocado, berries, cherries, citrus, grape, olive, pear, peach, pistachio, plum, walnut, etc.

Nursery and Ornamentals: Use minimum 1.0 gal spray solution/1000 sq. ft.

### Foliar

2 to 3 gallons

2 to 3 gallons

3.0 to 9.0 oz./1000 sq ft.
