

# GAME CHANGER™

## 2-11-10

### GUARANTEED ANALYSIS

<b>Total Nitrogen (N)</b> ..... <b>2.0%</b>	<b>Iron (Fe)</b> ..... <b>0.05%</b>
0.75% Ammoniacal Nitrogen	0.5% Chelated Iron
1.25% Urea Nitrogen	<b>Manganese (Mn)</b> ..... <b>0.05%</b>
<b>Available Phosphoric Acid (P<sub>2</sub>O<sub>5</sub>)</b> ... <b>11.0%</b>	0.05% Chelated Manganese
<b>Soluble Potash (K<sub>2</sub>O)</b> ..... <b>10.2%</b>	<b>Zinc (Zn)</b> ..... <b>0.02%</b>
<b>Sulfur (S)</b> ..... <b>0.90%</b>	0.02% Chelated Zinc
<b>Copper (Cu)</b> ..... <b>0.02%</b>	
0.02% Chelated Copper	

Derived From: Aqua Ammonia, Urea, Phosphoric Acid, Potassium Hydroxide, Ammonium ThioSulfate, Copper EDTA, Iron EDTA, Manganese EDTA, Zinc EDTA

ALSO CONTAINS BENEFICIAL SUBSTANCES  
5.0% Organic Matter

### GENERAL INFORMATION

GAME CHANGER™ contains light-refracting nano particles of macro and micro nutrients such as nitrogen, phosphorus, potash, zinc, iron, manganese, and copper. GAME CHANGER™ contains Ultra Gro's CROP SHIELD™, with added NPK. This combination will feed the plant necessary nutrients and help protect it from the heat and frost stress. It can be applied in combination with compatible plant growth regulators, pesticides, or other liquid fertilizers. GAME CHANGER™ is intended to be a supplement to a fertility program. Always monitor crop nutrient needs and responses with a soil, leaf tissue and irrigation water analysis program.

### COMPATIBILITY

This product has a near neutral pH and is compatible with many commonly applied nutrients and crop protection products. Contact an Ultra Gro, LLC representative for a list of compatible mixes. Jar test for compatibility prior to mixing with any pesticides, fertilizers or fertilizer blends. For unfamiliar mixes, an appropriate amount of the final mix should be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. User assumes full responsibility to ensure product, equipment and plant compatibilities.

### STORAGE AND SHELF LIFE

Store in a sealed container in a cool dry place, out of direct sunlight. Store at temperatures above 32°F and below 95°F. Use within 36 hours of mixing. Re-seal container after each use.

### DIRECTIONS FOR USE

#### SOIL APPLICATIONS

Soil applications may be made through fertigation (sprinklers, microsprinklers, drip, flood or furrow) or sprayed/injected in a band or in transplant solution. When applying this material via a fertigation system, continue to operate the system 30-60 minutes after material has completely injected to flush clean water through the system.

#### FOLIAR APPLICATIONS

GAME CHANGER™ is a concentrated solution and should be diluted with water before use to ensure uniform coverage. Do not apply this product foliar in concentrations greater than 15%. For maximum results, apply in the early morning or in the evening when air temperatures are optimum for foliar application. Do not apply GAME CHANGER™ during the hottest time of the day or to plants under drought or flood stress. DO NOT apply this product when the crop is under water stress. Application after irrigation or rainfall is best. Spraying should be carried out on a calm day but not during strong sunshine. Early morning or late afternoon applications are best. If rainfall occurs within 2 hours after application, it may be necessary to re-spray in 3 to 4 days.

#### AERIAL APPLICATIONS

Apply GAME CHANGER™ with at least 10 gallons of water per acre.

### SUGGESTED APPLICATION RATES & TIMINGS

Recommended but not limited to the following crops:

CROP	APPLICATION METHOD	RATE/ACRE	RECOMMENDATIONS AND TIMINGS
<b>VEGETABLE CROPS</b> Including Beans, Peas, Potatoes, Sweet Corn, Tomatoes, etc.	Foliar	2 to 3 gallons per acre with enough water to ensure uniform coverage	Apply when temperature exceeds 95F°. Reapply every 28 days until temperatures drop consistently below 95F°.
	Aerial	2 gallons with at least 10 gallons of water per acre	
<b>FIELD CROPS</b> Including Corn, Dry Beans, Sorghum, Sugarbeets, Sugar Cane, Cotton, etc.	Aerial	2 gallons with at least 10 gallons of water per acre	When Crop is Dormant: apply when crops are not achieving adequate chill hours or chill portions. Repeat every 28 days as needed.
<b>TREES AND VINES</b> Including Almond, Apple, Apricot, Avocado, Berry, Cherry, Citrus, Grape, Olive, Pear, Peach, Pistachio, Plum, Walnut, etc.	Aerial	2 gallons with at least 10 gallons of water per acre	When Crop is Dormant: apply when crops are not achieving adequate chill hours or chill portions. Repeat every 28 days as needed.
<b>COMMERCIAL ORNAMENTAL SHRUBS &amp; TREES</b> Including Azaleas, Gardenias, Junipers, Pines, Roses, etc.	Foliar	3 to 9 oz per 1,000 square feet in a minimum of 1 gallon of water	Apply when temperature exceeds 95F°. Reapply every 28 days until temperatures drop consistently below 95F°. When Crop is Dormant: apply when crops are not achieving adequate chill hours or chill portions. Repeat every 28 days as needed.

### PRECAUTIONS

AGITATE WELL BEFORE USE. NOT FOR USE IN ORGANIC CROP AND ORGANIC FOOD PRODUCTION.

**This product is not considered hazardous under the U.S. OSHA 29 CFR 1910.1200 Hazard Communication Standard.**

LIMITED WARRANTY Manufacturer or seller makes no warranty, whether expressed or implied, concerning the use of this product other than for the purposes indicated on the label. Neither manufacturer nor seller shall be liable for any injury or damage caused by this product due to misuse, mishandling, or any application not specifically described on the label.

Always refer to the label on the actual product container before using any Ultra Gro, LLC Products.
