

QUIC-K™

0-0-24

GUARANTEED ANALYSIS

Soluble Potash (K₂O)24.0%

Derived From: Potassium Acetate

ALSO CONTAINS BENEFICIAL SUBSTANCES
25.0% Organic Matter

GENERAL INFORMATION

QUIC-K™ is a unique and highly effective source of potassium designed for optimal foliar absorption. Potassium Acetate translocates sugars, starches, fats, and other essential nutrients directly into the leaves; its small molecular size allows for superior uptake compared to traditional potassium forms, ensuring your plants receive nutrients more efficiently.

With a near-neutral pH, QUIC-K™ enhances nutrient absorption and adsorption, making it an ideal choice for addressing potassium deficiencies without the risk of phytotoxicity. As a higher-grade potassium product, it effectively balances nutrient levels and targets specific potassium deficiencies.

This chloride-free solution features an extremely low salt index, minimizing the potential for phytotoxicity while providing a safe and user-friendly option for growers.

This product is not considered hazardous under the U.S. OSHA 29 CFR 1910.1200 Hazard Communication Standard.

LIMITED WARRANTY Manufacturer or seller makes no warranty, whether expressed or implied, concerning the use of this product other than for the purposes indicated on the label. Neither manufacturer nor seller shall be liable for any injury or damage caused by this product due to misuse, mishandling, or any application not specifically described on the label.

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. www.P65Warnings.ca.gov.

DIRECTIONS FOR USE

SOIL APPLICATIONS

Soil applications may be made through fertigation (sprinklers, microsprinklers, drip, flood or furrow) or sprayed/injected in a band or in transplant solution. When applying this material via a fertigation system, continue to operate the system 30-60 minutes after material has completely injected to flush clean water through the system.

FOLIAR APPLICATIONS

QUIC-K™ is a concentrated solution and should be diluted with water before use to ensure uniform coverage. Do not apply this product foliar in concentrations greater than 15%. For maximum results, apply in the early morning or in the evening when air temperatures are optimum for foliar application. Do not apply Quic-K™ during the hottest time of the day or to plants under drought or flood stress. DO NOT apply this product when the crop is under water stress. Application after irrigation or rainfall is best. Spraying should be carried out on a calm day but not during strong sunshine. Early morning or late afternoon applications are best. If rainfall occurs within 2 hours after application, it may be necessary to re-spray in 3 to 4 days.

PRECAUTIONS

AGITATE WELL BEFORE USE. NOT FOR USE IN ORGANIC CROP AND ORGANIC FOOD PRODUCTION.

COMPATIBILITY

This product has a near neutral pH and is compatible with many commonly applied nutrients and crop protection products. Contact an Ultra Gro, LLC representative for a list of compatible mixes. Jar test for compatibility prior to mixing with any pesticides, fertilizers or fertilizer blends. For unfamiliar mixes, an appropriate amount of the final mix should be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. User assumes full responsibility to ensure product, equipment and plant compatibilities.

STORAGE AND SHELF LIFE

Store in a sealed container in a cool dry place, out of direct sunlight. Store at temperatures above 32°F and below 95°F. Use within 36 hours of mixing. Re-seal container after each use.

SUGGESTED APPLICATION RATES

VEGETABLE CROPS Including Beans, Peas, Potatoes, Sweet Corn, Tomatoes, etc:

Foliar: 2 to 5 quarts per acre with enough water to provide uniform coverage

Aerial: 2 to 6 quarts per 10 gallons of water per acre

Soil: 2 to 5 gallons per acre with enough water to provide uniform coverage

FIELD CROPS Including Corn, Dry Beans, Sorghum, Sugarbeets, Sugar Cane, Cotton, etc.

Foliar: 2 to 5 quarts per acre with enough water to provide uniform coverage

Aerial: 2 to 6 quarts per 10 gallons of water per acre

Soil: 2 to 5 gallons per acre with enough water to provide uniform coverage

TREES AND VINES Including Almond, Apple, Apricot, Avocado, Berry, Cherry, Citrus, Grape, Olive, Pear, Peach, Pistachio, Plum, Walnut, etc.:

Foliar: 2 to 5 quarts per acre with enough water to provide uniform coverage

Aerial: 2 to 6 quarts per 10 gallons of water per acre

Soil: 2 to 5 gallons per acre with enough water to provide uniform coverage
